

Peal Compositions
of
Bristol Surprise Maximus
by
David G Hull

11 January 2008

This document represents my complete collection of compositions of Bristol Maximus, both rung and unring. Where known, rung compositions are marked with an asterisk, although there are probably some omissions.

The emphasis of most of the compositions is to produce little-bell roll-ups, occasionally offset with some more traditional back-bell roll-up music. There are a few exceptions to this, including several peals composed specifically for ringing on handbells (or double-handling!) which minimise the movement of 3-4 and 5-6. Some more recent efforts throw the back bells around a bit too – the jury is still out on whether this is worthwhile or not.

A number of peals over 6000 changes are also included for interest, including a couple of 10000s and a 26000. A number of people will not be surprised to note that I am now up to 5136 number 57!

As with any collection of compositions, typographical errors creep in from time to time. I hope I have kept these to a minimum but please, as always, prove a composition before you ring it. Please let me know of any errors that you find.

Anyone is welcome to ring any of the compositions, although please let me know if you ring one that isn't marked as having been rung before (and please credit the composition number in *The Ringing World* / Campanophile report).

DGH
